

SAMSON SIBY

BSc (Hons) Computer Science Graduate (First Class)

Sharjah, UAE | UAE Golden Visa Holder | UAE driving licence | Available immediately | +971 55 963 4091 |

samsonsiby2005@gmail.com | linkedin.com/in/samson-siby | github.com/SamsonSiby5827 | samsonsiby5827.github.io

PROFILE

First Class Computer Science graduate who builds ML that holds up in the real app, not just the notebook. Built and shipped DeepfakeGuard: raised held-out accuracy from 64% to 80%, rejected an 88% model that failed live testing, and deployed it with FastAPI, Docker, 11 automated tests in CI and a free live demo. Learning LLM applications next. Looking for an entry-level role in AI, ML, data or software.

EDUCATION

BSc (Hons) Computer Science - First Class Honours · University of West London, RAK Campus

SEP 2023 – MAY 2026

Coursework included machine learning, databases and analytics, cybersecurity, networking, mobile development, human-computer interaction and functional programming.

PROJECTS

DeepfakeGuard – AI Deepfake Detection and Blockchain Media Verification

FEB 2026 – PRESENT

Final-year project, extended after graduation · [Live demo](#) on Hugging Face

- Raised held-out accuracy from 64% to 80% (fake recall 0.53 → 0.78, 2,416 test images) by switching to face-cropped training and splitting data by video to prevent leakage; TensorFlow/Keras (EfficientNetB0), OpenCV.
- Rejected an 88% model after it labelled more than half of fakes as real in live testing; the kept model classified 37 of 40 images and 17 of 19 videos correctly in final live tests.
- Shipped v2 as a FastAPI service in Docker (same predictions as the local build) with 11 pytest tests in GitHub Actions CI, plus a model page and free in-browser ONNX demo on Hugging Face.
- Built a Flask app for image, batch and video detection, with SHA-256 file verification on a Solidity smart contract (local Ganache blockchain, Web3.py).

Landing and Webinar Pages – AUGE 10X

SEP 2026

- Delivered a new landing page for a book aimed at Italian-speaking adults in stages (conversion research → copy → build after approval), coded with AI agents (Claude Code, OpenAI Codex) using feature branches and pull requests.
- Built and presented a first version of an improved webinar funnel page to the team, and documented strategy and decisions in the team repository.

NorthStar Databases and Analytics

APR 2026

- Identified operational problems (delivery delays, failed services, complaints, route performance) in an urban-logistics case study using SQL in R and Python (Pandas, NumPy), and linked them to business questions in a report.
- Compared schema, indexing and query-optimisation options on a MongoDB Atlas database through PyMongo.

Android Application Security: Binary Protection and Reverse Engineering

APR 2026

- Recovered hardcoded values and readable logic from a deliberately vulnerable Android app (MobSF, JADX, ADB), confirmed they worked in the running app, and built a Java demo comparing R8/ProGuard-protected and unprotected builds.

Machine Learning Classification Study

MAR 2025

- Implemented Perceptron and K-Nearest Neighbour classifiers in Python; compared performance, visualised decision boundaries and analysed limits such as linear separability and feature scaling.

WORK EXPERIENCE

DreamBox Global (UAE)

JUN 2025 – JAN 2026

Social Media Intern

- Created social media posts, reels and campaign assets for company and client accounts using Canva and Photoshop.
- Updated WordPress and Wix websites and delivered work through client review cycles and deadlines.

SKILLS

- **Programming and data:** Python, SQL, R, Java, Kotlin, Haskell, HTML/CSS; Pandas, NumPy, MongoDB (PyMongo)
- **ML and computer vision:** TensorFlow/Keras, transfer learning (EfficientNetB0), OpenCV, ONNX, model evaluation (precision, recall, confusion matrices)
- **Deployment and tools:** FastAPI, Flask, Docker, pytest, GitHub Actions (CI), Git/GitHub, Hugging Face, Google Colab, Web3.py and Solidity (basic); AI tools (Claude, ChatGPT, Codex) with human review
- **Security, networking and design:** MobSF, JADX, ADB, R8/ProGuard, Android Studio, Cisco Packet Tracer (VLANs, subnetting); Figma, Canva, Photoshop, WordPress, Wix, Microsoft Office
- **Languages:** English (fluent) · Malayalam (fluent) · Hindi (intermediate) · Tamil (basic)
